

PNEUMATIC LEVEL SWITCH

Characteristics

The purpose of pneumatic level switch is signalling that the maximum level of the tank has been reached, only by using compressed air.

Technology patented by DIMACO.

The parts in contact with the contents of the tank are resistant to hydrocarbons.

Other features:

- Visual indicator of full tank
- Automatic opening of valve
- Simple regulation of maximum level

Data Sheet

tank adaptor size	1" M.thr. + ferrule
type of fittings	push-fit
size of fittings	8 mm
shell material	aluminium
rod material	stainless steel
float material	NBR/foam
cap seal material	NBR/foam
float diameter	30 mm/45 mm
operating pressure	2,5 - 7 bar
